SPINDKOOL™ SAW - RSDP Series 30

Advanced technology cutting fluid and coolant formulated for the metalworking application of **sawing**. *SPINDKOOL™ SAW* is formulated to assist in most metal cutting and machining operations on ferrous, non-ferrous and specialty alloys. It is also non-chlorine, non-sulfur, non-phenol and non-nitrate based formula. The formulation, *SPINDKOOL™ SAW*, is a clear-green, non-petroleum based product formulated with biodegradable ingredients. The results have been superior. The **30 Series** is designed for **flood coolant of saws**.

Performance qualities include:

- Lubricating abilities
- Excellent cooling and heat transfer
- Non-flammable
- Superior fluid stability (no ingredient separation)
- Cost performance
- Water soluble
- Easy disposal

Process Effects:

Longer tool life
Reduced thermal deformation of work piece
Better surface finish (some applications)

Recommended Dilution:

SPINDKOOL™ SAW should be used at a mix ratio of 20:1, water to product, depending on the severity of the operation and work piece material.
